

# SPECIMEN 6

Specimen 6 was the sixth xenomorph created by Dr. H.G. Groves at the Weyland-Yutani research facility on BG-386. Showing an exceptional aptitude in intelligence, Specimen 6 was subjected to many tests involving her brutal combat lethality, including being allowed to hunt down and kill guards and various technicians. Eventually, she escaped and freed the Matriarch that had been being held captive to spawn eggs, resulting in the destruction of the facility.

SP	CC/DEF	RS	ST	CON	WP	LD	W	A	SZ	PTS
